

## ABSTRACT

Title: "Coating for drinking water pipelines"

5 A two-part coating system comprises a first part comprising one or more aliphatic  
polyisocyanates, optionally blended with one or more "amine reactive" resins and/or non  
reactive resins, and a second part comprising one or more aromatic polyamines optionally  
blended with one or more oligomeric polyamines, such that the two parts, when mixed together  
and applied to the internal surfaces of pipelines, form a rapid setting impervious coating suitable  
10 for contact with drinking water.
